

CATTINI e FIGLIO SPA

QUALITY AND ENVIRONMENTAL POLICY

Cattini e Figlio S.p.a. intends to increase its value and provide excellence to its customers by operating in compliance with the principles of environmental protection and the management of total quality which represent the fundamentals of the entire Organization.

Our Organisation is committed to meet the obligations of compliance with the UNI EN ISO 9001: 2015, UNI EN ISO 14001: 2015 and IATF 16949: 2016 standards and to operate for the continuous improvement of its integrated system to increase the environmental and qualitative performance.

The analysis of the context, the assessment of risks and opportunities as well as the monitoring of the environmental and qualitative impacts of our activities, products and services are aimed to the improved loyalty of our customers as well as the adequacy of our suppliers and internal resources.

For this purpose, the Organization has the following priority objectives:

- Build customer loyalty and constantly expand the range of customers, assuring them a high level of satisfaction in terms of quality, services, costs and technology and, in general, an excellent supply experience (TPE = Total Procurement Experience);
- Optimize resources with the aim of increasing the efficiency of all company departments;
- Establish and periodically update the quality and environmental targets with a view to a continuous improvement, in line with this policy, as well as monitoring them and assuring their adequate internal communication;
- Motivate and incentivize all staff by making sure they have the skills necessary for the role they perform, enhancing their professionalism through training and development courses;
- Commit to reduce the significant environmental impacts generated by factors such as emissions into the atmosphere, waste produced, management of water discharges, potential soil and subsoil contamination, the use of raw materials, the use of chemical agents less dangerous for the environment, taking care to preserve natural resources;
- Select and qualify its supply network by establishing and applying qualitative and environmental criteria aimed at ensuring compliance with the requirements of the above standards.
- Operate in a safe workplace, monitoring and anticipating risk situations and taking the relevant legislative provisions as a reference;
- Operate with high moral integrity towards anyone who comes into contact with the Organization itself;
- Verify, during Management Review, the suitability of this policy, update it when necessary and ensure that it is communicated within the Organization and available to interested parties;

Lorenzo Cattini – C.e.o.
